

## BRUDE MES Chute and Slide

Obtain the advantages from Brude Evacuation Systems for all passenger vessels

**Brude Safety** offers a variety of MES well suited for all passenger vessels. The Brude MES Slide and the Brude MES Chute meet all demands for effective evacuation from heights up to 15 metres. Liferrafts from DSB.

### **BRUDE MES ORL Twin Pack for 300 passengers**

Brude MES ORL 300 is developed to allow an efficient and safe evacuation of passengers on vessels in sea area up to D and evacuation heights from 3 to 15 metres. All operations regarding manning of the system are manual and can be carried out by one crew member.

**Components:** One complete deployment arrangement with evacuation chute and mooring system. Two twin packed life rafts of type DSB LR 97 R 150 person.

**The BRUDE MES Slide System** uses the same life rafts as the other Brude MES system, and are suitable in evacuation heights from 1.5 to 3 metres. The slide system is used on HSC catamarans and ferries. Capacity from 50 to 450 persons with one slide. Brude Safety AS runs an extensive system of replacement rafts, shutles and slides, which means that the vessels can continue operations uninterrupted.

All Brude systems are tested in accordance with all relevant requirements under the supervision of See Berufs Genossenschaft (SBG) as the notifying body, and consequently all systems are EC-type approved.

## BRUDE MES Chute and Slide Technical Information

The BRUDE MES Shute and Slide are designed and manufactured according to the latest SOLAS, Classification Society and National Authority requirements.

### Advantages Brude MES

Refits on vessels are easily made due to a minimum of work by contractor; only mounting on deck for chute container, liferaft rack and fixing details on shipside for mooring details

- Simplified due to a less space demanding system

Room in the chute for a crewmember to descend next to evacuating passengers

Training –Easy to train new crewmembers

Regullary use of chute

- No re-certification

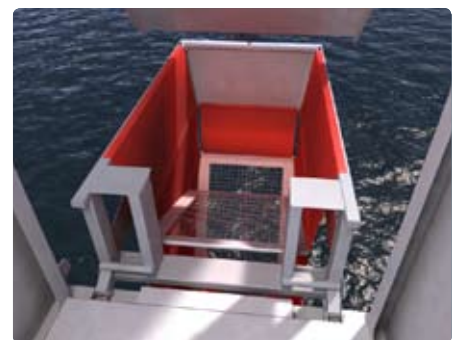

Easy maintenance

Complete flexibility by use of the chute and rafts with 20 % heeling

- The chute can be extended and the mooringlines can be adjusted

Green passport

- No hydraulic
  - No electrical
  - Rafts of natural rubber
  - High degree of recyclability
- \* = Shipyard
